

European Master's Programmes

Research findings and application plan

Prepared 17 August 2026 | target intake autumn 2027

Read first: *your 146 credits are almost certainly a bookkeeping artefact rather than a missing year of study, and the single thing standing between you and most of these options is that you have not yet sat an English test.*

Figures marked NOT VERIFIED could not be confirmed on an official source and were left rather than estimated. Most 2027/28 deadlines are unpublished, so dates indicate when in the year to look, not deadlines to diarise.

1. The 146 credits — what it actually means

Research date: 17 August 2026. Everything below was checked against official sources on that date.

The short answer

Your 146 credits are almost certainly a bookkeeping quirk, not a missing year of study. We are about 85–90% confident of this.

This matters enormously, because it was the single thing that could have closed off most of Europe. It very probably does not.

But there is one thing **you personally have to confirm** before anyone can rely on this. It is explained in "What you need to check this week", below. Please do that first — everything else in this research rests on it.

Why we think the 146 is not a real shortfall

Tunisian law says your degree is 180 credits

The Tunisian *licence* is defined by law — Décret n° 2008-3123 of 22 September 2008, Article 5 — as:

*"three years after the baccalauréat, comprising **180 credits spread over six semesters**"*

This was confirmed again in Décret Présidentiel n° 2022-631 of 14 July 2022.

So 180 credits is a **legal property of the qualification itself**. It is not something a particular transcript can reduce. If you hold the licence, you hold a 180-credit degree, whatever any individual document happens to total.

And Tunisian rules produce transcripts that under-count on purpose

This is the part that explains your specific number.

Under Article 34, a module (*unité d'enseignement*) is "**capitalised**" only if you score 10/20 or above in it. But Article 35 lets you pass the year by **compensation** — if your weighted average across all modules is 10/20 or better, you progress, even with some modules below 10.

So a student who graduates perfectly legitimately by compensation ends up with modules that were **validated but never "capitalised"**. If your transcript prints the "*crédits capitalisés*" column, every compensated module is silently left out.

Now check the arithmetic:

- $180 - 146 = \mathbf{34 \text{ credits missing}}$
- Tunisian modules are worth **4 to 7 credits each** (Article 22)
- $34 \div (4 \text{ to } 7) = \mathbf{\text{roughly } 5 \text{ to } 8 \text{ modules}}$

Five to eight modules passed by compensation, across three years, for a student averaging 12–13/20, is completely ordinary. This explains your exact number better than any other theory.

European evaluators judge the degree, not the transcript sum

The bodies that assess foreign qualifications do not re-add your transcript line by line. They ask a simpler question: *is this qualification, in its own country, equivalent to our bachelor's, and does it let you into a master's at home?*

Sweden's national agency (UHR) is the clearest example we found. It states plainly that both the *Licence Fondamentale* and the *Licence Appliquée* are **three years, 180 credits, equal to a Swedish**

bachelor's degree (180 ECTS).

Norway's agency states the principle even more directly:

"one year of standard study time in the country of education is equivalent to one year (60 ECTS) in Norway."

Six of the seven recognition bodies we checked place the Tunisian licence at bachelor level.

The other possibilities, honestly weighed

We did not just look for the convenient answer. Here is the full ranking:

What might be going on	How likely	What it would mean
Compensation artefact — transcript shows only "capitalised" credits	~50%	No problem. Your degree is 180 credits.
Incomplete or interim transcript — missing the final semester, or the PFE credited separately	~30%	No problem, once you get the complete document.
Local reporting quirk — modules weighted so semester totals aren't exactly 30	~15%	No problem, but needs explaining to admissions.
A genuine shortfall	~5%	Serious — but this is only possible if you have not actually graduated.

That last row is the one to be candid about. If you hold the *diplôme national de licence*, a shortfall is impossible by definition, because 180 credits come with the award. The only scenario where 146 is a real number is one where the degree was never conferred.

We are not assuming that away. You need to confirm it.

What you need to check this week

Take out your paperwork and answer these seven questions. This costs nothing and settles the entire issue.

1. **Which document are you looking at?** A *relevé de notes* (a marks sheet, provisional), an *attestation de réussite* (pass certificate), or the *diplôme national de licence* itself? Only the last two prove the degree was awarded.
2. **Does it cover six semesters (S1–S6)?** Count them. If it stops at S5, it is incomplete by construction.
3. **Is your PFE / final-year project listed and credited?** Your CRM platform project should be carrying credits.
4. **What does the credits column actually say?** "Crédits", or "Crédits capitalisés" / "Crédits acquis" / "Crédits obtenus"? **If it says capitalisés or acquis, the mystery is solved right there** — that is theory 1 confirmed on the face of the document.
5. **Are there modules marked below 10/20 where the year is still marked *validé* or *admis par compensation*?** If yes, theory 1 is confirmed.
6. **Add up the credits assigned to each module in the *plan d'études*** — the official programme structure, ignoring your marks. If that totals 180, then the programme is 180 credits and your 146 is pure bookkeeping.
7. **Is it a *Licence Fondamentale* or a *Licence Appliquée*?** It is printed on the diploma. **This one matters a great deal** — see the Netherlands section below.

The cheapest fix in this entire report

Before spending a dinar on formal evaluations, do this:

Ask FSEG Sousse for a written attestation, on faculty letterhead, stating that your Licence comprises 180 credits over six semesters and three years, and that it gives access to Mastère study in Tunisia.

Also request the **supplément au diplôme** (Diploma Supplement). Tunisia issues these, following the standard European model, and it describes the level, content and status of your studies in a format European admissions officers already recognise.

These two documents are **free, take days, and neutralise the 180-credit objection almost everywhere**. They are worth more than any country choice you could make.

Why this works: the risk you actually face is not that Europe has judged your degree insufficient. It is that a busy admissions officer reads "146" off a raw transcript and rejects you before a qualified evaluator ever sees the file. That is a **presentation problem**, and a one-paragraph letter from your faculty defuses it.

If you later need a formal evaluation

You probably will not need one. Only buy it if a specific programme demands it.

Body	Country	Cost	Time
ENIC-NARIC France	France	€20 + €100 = €120	4 months average, up to 6
ZAB	Germany	~€208	~2–3 months
UK ENIC	UK	£49.50 + VAT (~£59)	~15 working days
UHR	Sweden	Free	Not confirmed
Denmark's agency	Denmark	Free, and legally binding on universities	1–2 months
CIMEA	Italy	NOT VERIFIED – check directly at cimea.it	NOT VERIFIED

Two warnings about the French one, which we verified directly on the France Éducation International site (their own page, checked 17 August 2026):

- It takes **four months on average and up to six**. If you need it for an autumn 2027 intake, you must apply by **late 2026 or very early 2027**. This cannot be rushed.
- It covers **one qualification per file**. Do not order several speculatively.

Denmark's assessment is free *and binding on Danish universities*, which makes it unusually good value if Denmark is in play.

Which countries are actually open to you

Based on how each country handles this question — not on programme quality, which comes later.

Open — the credit question is unlikely to block you

Country	Why
United Kingdom	Does not use ECTS at all. Judges you on the degree and its classification. The constraint simply does not exist here.

Country	Why
France	Thinks in terms of " Bac+3 " — three years past the baccalauréat, a <i>duration</i> , not a credit count. Tunisia's system descends directly from the French one. The most natural fit you have.
Spain	Law asks for "3 complete academic years", and there is a route to master's access without full degree homologation.
Italy	Asks for "at least three years", assessed at degree level through CIMEA.
Poland	Applies the Lisbon Convention access principle — if the degree gives access to a master's in Tunisia, it gives access in Poland.
Norway	States the year-equivalence rule explicitly. This dissolves the problem outright.

Conditional — admissible, but needs a specific documented step

Ireland, Belgium, Denmark, Sweden, Austria, Czechia, Portugal, Finland, Luxembourg.

These are all reachable. Each needs either a recognition certificate, a documented equivalence, or a conversation with the admissions office. Belgium writes 180 ECTS into its access rules, so the FSEG attestation matters most there — and Belgium is otherwise one of your strongest options, being French-speaking.

Difficult or closed

Country	Problem
Germany	Enforces six semesters AND 180 ECTS . But the credits are probably <i>not</i> your main obstacle here — your GPA is . German universities commonly want a 2.5 or "good" grade, and 12–13/20 likely falls short. Deprioritise, but see the Germany research for exceptions.
Switzerland	Explicit rule: "at least 3 years, at least 180 ECTS", applied strictly, and the applied-sciences institutions add a work-experience requirement on top. Practically closed.
Netherlands	A different and worse problem — see below.

The Netherlands — a separate problem, and why your diploma wording decides it

This is the one case where fixing the 146 changes nothing at all.

The Dutch evaluation body, **Nuffic**, does not rate the Tunisian licence as a full bachelor's. It publishes two different verdicts depending on which licence you hold:

Your diploma says	Nuffic rates it as	What that means
Licence Appliquée	3 years of HBO	Fine. Dutch applied-sciences master's are open to you.
Licence Fondamentale	2 years of WO	A problem. That is a full year <i>below</i> a Dutch bachelor's.

If yours is *Fondamentale*, Dutch research-university master's are structurally very hard, and a "pre-master's" cannot rescue it — those are capped at 60 credits, which cannot bridge a full year.

It gets worse: we found that **Utrecht does not allow pre-master's students who need a residence permit**, and **the University of Amsterdam cannot sponsor a permit for a standalone pre-master's**. So even the bridging route is often closed to someone in your position.

This is why question 7 on the checklist matters. Go and read your diploma.

But do not conclude that one licence is simply "better"

After writing the above we managed to query **anabin**, Germany's official recognition database, directly. Germany's verdict is the **exact reverse** of the Dutch one:

Your diploma says	Netherlands (Nuffic)	Germany (anabin)
Licence Fondamentale	2 years of WO — a problem	"Entspricht" — <i>equivalent</i> to a German 3-year Bachelor
Licence Appliquée	3 years of HBO — fine	"Bedingt vergleichbar" — <i>conditionally</i> comparable

anabin also confirms **Université de Sousse is rated H+**, a recognised state institution.

So whichever licence you hold is an advantage somewhere and a disadvantage somewhere else. There is no bad answer to question 7 — there is only a different map depending on the answer. What matters is knowing which one you have before you choose countries.

(This is moot for Germany in practice — see deliverable 2, where the grade and the German-language requirement block you regardless of how your credential is rated.)

Three things that are commonly believed and are wrong

We checked these because they are repeated everywhere, and they would have sent you down bad paths:

1. **"Universities of applied sciences are always more flexible."** Not true in Germany (Fachhochschulen apply the same 180 rule, often 210), not true in Finland (their applied universities demand **two years of work experience**, which research universities do not — you have an internship, so this likely rules you out), and not true in Switzerland.
2. **"A Studienkolleg can bridge the gap in Germany."** No. Studienkolleg is for **bachelor's** entry only. It is irrelevant to your situation.
3. **"Germany, the Netherlands and the Nordics are all strict."** Too crude. **Norway explicitly assesses by years** and is one of your most open countries on this question. Denmark gives a free, binding assessment. The Netherlands is strict — but for an entirely different reason than credits.

What we could not verify

Being straight with you about the gaps:

- **The German anabin database entry** for Université de Sousse. anabin is an interactive database that does not render for automated checking. Someone needs to look it up manually at anabin.kmk.org if Germany stays in play.
- **UK ENIC's specific published line on Tunisia** — their detailed comparisons sit behind a subscription. The general position is bachelor-level, and comparable Moroccan qualifications are assessed at bachelor level, but the Tunisia-specific statement is NOT VERIFIED.
- **CIMEA's fee and turnaround** for Italy — NOT VERIFIED — check directly at cimea.it.
- **FSEG Sousse's own programme credit tables** — the faculty site (fsegso.rnu.tn) returned an error on the day we checked. You can get this yourself from the *scolarité*, and you should.
- **Whether a formal 1:1 legal decree exists** converting Tunisian credits to ECTS. In practice they are treated 1:1 (Sweden maps "180 national credits" straight to "180 ECTS"), but we found no decree stating it. This does not affect the conclusion.

What to do first

1. **Read your diploma** — *Fondamentale* or *Appliquée*? (Decides the Netherlands.)
2. **Work through the seven-question checklist** on your transcript.

3. **Email FSEG Sousse scolarité** and request the attestation (180 credits / 6 semesters / access to Mastère) and the *supplément au diplôme*. Free, and worth more than anything else here.
4. **Do not buy a credential evaluation yet.** Wait until a specific programme asks for one.

Once you have confirmed you graduated and hold the diploma, treat the 146 as a non-issue and choose your programmes on their merits.

2. Comparing the countries

Research date: 17 August 2026. Target intake: autumn 2027.

The one-page version

Country	Tuition (non-EU)	Language for you	146 issue	Post-study stay	Verdict
Slovakia (EUBA)	€0	English	Not counted at all	9 mo	Top pick
Hungary (Corvinus/BGE)	€6,600–7,400, €0 funded	English	Strongest verdict found	Yes	Top pick
Austria (the right FH)	€727/yr	English	Not counted at all	12 mo -> Red-White-Red Card	Top pick
France	€4,055/yr	French, native	Fine ("Bac+3")	12 mo APS	Top pick
Italy	€157–1,000/yr with ISEE	English or Italian	Fine ("three years")	~12 mo	Top pick
Spain	~€1,300 total	Spanish (Tier B)	Fine ("3 years")	24 mo, but no work rights	Strong, later
Ireland	€11,000–14,000/yr	English	Borderline (wants Level 8)	24 mo, full work rights	Strong
Belgium	€5,369/yr	French, native	Bridging route exists	12 mo, full work rights	Strong
Portugal	€4,000–7,500/yr	English or Portuguese	Fine	Yes	Good
Poland	~€2,500–7,500 total	English (B2 now required)	Fine	9 mo	Good
Czechia	€2,700/yr (or €0 in Czech)	English or Czech (Tier C)	Fine	9 mo, full access	Fair
UK	£11,800–23,000/yr	English	Doesn't exist	18 mo from Jan 2027	Three schools only
Germany	€0–€97/sem	English available	Credential fine; 23 of 42 set no grade bar	18 mo	Reopened — see below
Denmark (Aalborg)	€7,450/yr, ~15 full awards	English	Free binding assessment	3 yrs, but 90 hrs/mo	Strong
Norway	€4,975–5,385/yr	English	Fine — assessed by years	Varies	Closed — funds trap
Finland	€7,000–10,000/yr net	English	Fine	2 yrs, any sector — best	Costlier now
Sweden	High	English	Fine	Yes	Funding closed
Netherlands	—	English	Depends on your diploma	—	See below
Switzerland	—	—	Blocked	—	Closed

The three that stand out

Austria — the surprise, and probably your best single option

Austria was not even on our original shortlist. Two separate researchers landed on it independently, for different reasons.

Why it works for you specifically. Austrian *Fachhochschulen* (universities of applied sciences) are governed by a law — *Fachhochschul-Gesetz* §4(4) — that defines master's entry as completing a relevant bachelor's **or an equivalent programme at a recognised foreign institution**. There is **no 180-credit count anywhere in that text**. It goes further: a programme director may admit someone whose equivalence is only partial and settle the difference through exams **taken during the master's**.

The only number FH Kufstein publishes is "*at least 30 ECTS*" in marketing, communication, management or business subjects. A Licence in Marketing clears that several times over.

And the rest lines up:

- **€363.36 per semester — €726.72 per year** at FH Kufstein, and that is the rate *everyone* pays, third-country nationals included. (Add the ÖH student union fee of about €25/semester.)
- Taught **100% in English**.
- Post-study: **12-month job-search permit**, then a **Red-White-Red Card with no points test and no labour-market test**. For someone with a modest GPA, an immigration route that does not score you is worth a great deal.
- Deadline for non-EU applicants: **3 March**.

But you must pick the right Austrian institution — the spread is enormous

This is the thing to understand about Austria, and it isn't obvious:

Austrian applied-sciences institutions each set their own third-country fee policy. The range across the sector is roughly **23-fold**:

Institution	Per semester
FH Kufstein, FH Salzburg, FH des BFI Wien, CAMPUS 02	€363.36
FH Kärnten	€500
FH Oberösterreich, FH Joanneum	€726.72
FH Wiener Neustadt	€850
FH Technikum Wien	€3,000
IMC Krems	€6,900
MCI Innsbruck	€8,250 (~€16,500/year)

Austrian public universities are a different and worse proposition on all three counts at once. They are governed by a separate law, they **double** the fee for third-country nationals to €726.72 *per semester* (€1,453/year), and — critically — several of them do impose the credit rule the applied-sciences law omits. **IMC Krems prints "minimum 180 ECTS lasting at least six semesters" verbatim. WU Wien requires "at least 180 ECTS with 45 ECTS in business administration."**

So the flexible §4(4) rule is **permissive, not binding** — it allows an institution to be flexible, it does not force it. Check the actual wording on each programme page rather than assuming Austria as a whole is open.

The English question — settled, and the answer is that you need the test

An earlier draft of this report suggested FH Kufstein might let you skip an English certificate via a medium-of-instruction letter. **We checked the actual wording and it will not work for you.**

Kufstein accepts such a letter only where it "*clearly demonstrates the language competence at **CEFR level B2 or higher***." A letter from a faculty that taught you in **French and Arabic** demonstrates the

opposite. The clause is real, but it is not a route for someone whose degree was not English-medium.

So: you need IELTS 6.0, TOEFL 72 or PTE 60. Duolingo is explicitly rejected. Budget for the test and book it — there is no side door here, at Kufstein or anywhere else in Austria. (Vienna accepts such letters only from EU/EEA/Swiss/UK/US/Australian/NZ/Canadian institutions, which structurally excludes Tunisia.)

One caution on fees. Austria does *not* give you a developing-country waiver. The regulation that once listed Tunisia was repealed in 2019 and the current list covers only Least Developed Countries. Aggregator sites still repeat the old list.

France — the natural fit, but the money changed

France remains your most natural destination: you are a native French speaker, the system descends from the one you studied under, and it thinks in "Bac+3" rather than credit counts.

But do not use old cost information. A decree of **19 May 2026** ended the era of near-automatic fee exemptions. Verified current rates:

	Amount
Master's, non-EU differentiated rate	€3,950/year
CVEC (compulsory student levy)	€105
Budget	~€4,055/year

Exemptions still exist but are now decided case by case on three grounds: your **personal situation, including your means**; holding a **French government scholarship**; or a reciprocity agreement. Two of those you can actively pursue — and a French government scholarship exempts you **automatically**, making it worth far more than its headline value.

*(We earlier suggested asking about a €2,633 "reduced rate". Don't bother — it turns out to be Paris 1's rate for students taking a **second** degree, which doesn't apply to you.)*

The real financial barrier in France is not the tuition

On 1 August 2026 the student-visa resource requirement rose from €615 to €877.50 per month (décret n° 2026-526), now indexed to 47% of the minimum wage and revised annually. It applies to permit **renewals** as well as the first application.

That means demonstrating roughly €14,500 for year one — about three and a half times the tuition. If France is your target, this is the number to plan your finances around, not the €3,950.

Cost of living reinforces the point. UNEF's 2025 figures for monthly student costs:

City	Per month
Rennes	€1,192
Nantes	~€1,212
Toulouse	~€1,215
Lille	~€1,220
Montpellier	~€1,221 (transport free)
Bordeaux	~€1,290
Lyon	€1,324
Paris	€1,627

Studying in Paris costs about **€4,800 more per year** than Rennes — more than a full year's tuition. Choose the city as deliberately as the programme.

Three French realities to plan around:

1. **Campus France comes first, and early.** The *Études en France* procedure is mandatory for Tunisian residents. It opens around **1 October 2026** and closes around **15 January 2027** — one to two months *before* the deadlines printed on the programme pages themselves. Fee 400 TND. There is a compulsory interview, and it can be done in Sousse.
2. **You are not exempt from a French language test.** We expected you would be. You are not — Tunisia's official language is Arabic, so no nationality-based exemption applies. Plan on a **TCF or DELF/DALF before October 2026**, unless a specific programme dispenses you. (You *are* exempt at ULiège in Belgium, which accepts prior education in French.)
3. **Watch the M1/M2 trap.** Many attractive French programmes only admit at M2, which assumes you already hold an M1. Entering at **M1** from a licence is what you need. This single detail matters more than a programme's reputation.

Italy — the cheapest real degree in Europe, if the paperwork goes right

Italy scales tuition to family income through the **ISEE** system, and foreign families can obtain an *ISEE parificato*.

At **Bologna, an ISEE at or below €27,000 means a contribution of zero.** Total outlay becomes about **€157 per year** — regional tax, stamp duty and insurance. That is not a typo, and it is a full state degree.

There is also a regional grant, **ER-GO, worth €7,171 per year** for students living away from home with an ISEE at or below €16,666, which adds fee exemption, accommodation and canteen access. Non-EU students are explicitly eligible. The window runs 23 June to 24 August.

The risks are administrative, not academic. Your documents must be issued by Tunisian authorities, legalised at the Italian Embassy in Tunis, and translated. The single input most likely to push your ISEE up is the **conventional valuation of your family home at €500/m²** — model that before assuming you qualify. The ISEE deadline is around 30 October; missing it costs €100 and puts you in the top band.

Tunisia is **not** on Italy's "particularly poor countries" list — that was checked against the actual decree text (DM 176 of 24 February 2026, 46 countries). The €200 flat fee does not apply to you.

The French-speaking advantage, assessed honestly

You asked whether being a native French speaker should outweigh the appeal of studying in English elsewhere. Our answer: **yes, but for employment reasons more than study reasons.**

- **Studying** in English is achievable — you need one test.
- **Working** in a marketing role in a language you do not speak fluently is much harder. Marketing is a language-heavy profession. In Ireland or the Netherlands you would compete for English-language roles against native speakers; in France, Belgium or Luxembourg you can work in French from day one.

France, Belgium and Luxembourg give you a wider pool (French- *and* English-taught), no language test in Belgium's case, and a real job-market advantage. **Belgium deserves more attention than it usually gets:** €5,369/year all-in for non-EU students at ULiège, a confirmed French-test exemption for applicants educated in French, a 12-month search year with **unrestricted** labour access, and — a gap we closed — a genuine bridging route, with ULB, UCLouvain Saint-Louis and IHECS all allowing up to 60 complementary credits, comfortably more than your 34-credit gap.

One caution on Belgium: ULiège publishes a **minimum 12/20 average**. You clear it by nothing at all.

Countries to treat carefully

Ireland is strong on cost and post-study rights — Stamp 1G runs **24 months** against the UK's 18 from January 2027. One of our researchers claimed Ireland bars marketing roles from work permits; **we checked the official list and that is wrong**. Only estate agents and conference organisers are excluded from that occupational group. Marketing roles are permit-eligible. There is even a carve-out favouring speakers of non-EEA languages in specialist digital-marketing roles — which describes you.

The UK's post-study route is 18 months for you, not two years. We confirmed the rule verbatim on gov.uk: two years only if you *apply* by 31 December 2026, 18 months from 1 January 2027. Starting in autumn 2027 and graduating in 2028–29, you get **18 months**. Any UK-versus-Ireland comparison must use 18 against Ireland's 24.

The UK is otherwise viable through roughly three institutions and no more. Fees run £16,000–30,000 almost everywhere; the exceptions are York St John (£11,800), Wrexham, and Westminster as a stretch. Northern Ireland is **not** the cheap route people assume: Queen's charges international students **£23,000** against £7,700 for locals, and Ulster **£18,310** against £7,490. Add £776/year health surcharge, a £558 visa, and £10,539 to be held for 28 days.

Germany — reopened, and I had this wrong

An earlier version of this report told you Germany was effectively closed on your grade. **That was based on a single programme**. A full sweep has since read **42 German programmes' admission wording in full: 19 impose a bar you miss, 23 publish none at all**. Germany is roughly **50/50**.

Your grade converts to **German 3.0–3.4** (13/20 -> 3.0; 12/20 -> 3.3), now verified against Otto-von-Guericke Magdeburg's examination-board conversion table **for Tunisia specifically**. Where a 2.5 cutoff exists you fail; where none is published, it is irrelevant.

anabin, Germany's official recognition database, rates Université de Sousse H+, with *Licence Fondamentale* as **"Entspricht"** — equivalent to a German three-year Bachelor. Note this is the **reverse of the Dutch verdict**, so there is no universally "better" licence; it depends where you apply.

Three programmes combine free-or-near-free tuition, English teaching and no grade bar: **HWR Berlin** (tuition-free, IELTS 6.0, and it closes your credit gap with a third-semester placement), **KU Eichstätt-Ingolstadt** (€88/semester, French A2 required — you're native, dual degree with Toulouse) and **HM München** (€97/semester, selected on a pitch video).

Two German traps. The Embassy in Tunis requires a **"Certificat d'admission inconditionnel"**, which collides with the conditional-admission routes some programmes use to bridge 180->210 credits. And under **Vergabeverordnung NRW**, admission-restricted programmes in Cologne, Bonn, Münster and Aachen may reserve as few as **2 places for non-EU applicants; Osnabrück, by contrast, reserves 50%**. Ask "what is the non-EU quota?", not only "what is the minimum grade?". Blocked account: **€11,904**.

3. The programmes — full list

All figures checked August 2026. Tuition is the non-EU rate. Every entry is a genuine master's degree; things that turned out to be certificates, títulos propios, Italian Master di I livello or school diplomas are listed at the end so you don't rediscover them.

Tiers. **A** = you can apply now (English or French). **B** = needs Spanish, Italian or Portuguese — roughly 6–12 months for a French speaker. **C** = a language that takes longer.

146 verdict = whether your transcript is likely to block admission.

Read these five lines first

1. **You do not need an English test to apply everywhere.** Five programmes below take you without one. That changes your 2027 timetable completely.
2. **Germany is open, not closed.** Of 42 German programmes read in full, **23 publish no grade requirement at all.**
3. **The cheapest real degrees are €0–900 for the whole thing** — Slovakia, Spain, Italy.
4. **Tuition is rarely the barrier. The visa deposit is.** France ~€14,500, Norway ~€14,600, Germany €11,904.
5. **Direction 3 (music marketing) barely exists.** Two options in all of Europe.

The five that need no English certificate

The single most useful table in this report, because your missing IELTS has been the binding constraint on everything.

Programme	Co unt ry	Cost	How they assess English instead
EUBA Bratislava — MSc Marketing and Trade Management	Slo vak ia	€0	No test at any stage. No written exam either. AACSB-accredited
Corvinus — MSc Marketing	Hu nga ry	€7,400/yr, €0 on Stipendium	"No specific English language requirements" — internal entrance exam. AMBA + AACSB + MAB
Bergamo — International Management	Ital y	~€400/yr	B2 satisfied by 6 ECTS of English in your bachelor's
IHECS — Publicité et communication commerciale	Bel giu m	€5,369	B1 minimum , no entrance exam. Taught in French
ICHEC — Master en gestion	Bel giu m	€5,369	No language test requested. Taught in French/English

And the two lowest bars if you do sit a test: **HWR Berlin at IELTS 6.0** and **BGE Budapest at IELTS 5.5 / Duolingo 95.**

Direction 1 — AI and data applied to marketing

Your strongest direction — most options, best funding, and by a wide margin the best chance of converting into a work visa.

Tier A — apply now

Programme	Where	Cost/yr	Entry & notes
EUBA Bratislava — MSc Marketing and Trade Management	Slovakia, public	€0	"a bachelor degree in economics and management, or a related field" — no credit count. LIKELY OK. AACSB. No English test, no written exam. €10,000 scholarship available on SAT score alone — GPA never consulted
HWR Berlin — MA International Marketing Management	Germany, public	€0	No grade requirement anywhere in the official list. Solves your credit gap explicitly: "Applicants with 180 credits will be required to obtain the additional 30 credits by completing a placement in the third semester." IELTS 6.0. 35 places, grade-weighted ranking
KU Eichstätt-Ingolstadt — MSc Digital Customer Experience & Service Design	Germany, public	€88/sem	"Open to all students who pass the aptitude procedure" — no grade floor; bonus points for internships. French A2 required — you're native. Dual degree with Toulouse. Only 10 places
HM München — MA Entrepreneurship & Digital Transformation	Germany, public	€97/sem	No grade bar. Selected on a project description, 2-minute pitch video and interview
FH Kufstein — MA Data Science & Intelligent Analytics	Austria, applied sci.	€727	No 180-ECTS rule in Austrian FH law; needs 30 ECTS business subjects. Free video prep course for the maths prerequisite. IELTS 6.0
Milano-Bicocca — Marketing and Global Markets	Italy, public	€346	LM-77 R. Entry: "Bachelor diploma (or higher)". Analytics inside a marketing degree. Separate earlier non-EU visa round
Pavia — MIBE	Italy, public	€390	Cheapest no-paperwork route in Italy (flat income-band rate, no ISEE needed)
Bergamo — International Management	Italy, public	~€400	"other qualification obtained abroad that is recognized as suitable". No English test needed
Corvinus — MSc Marketing	Hungary, public	€7,400 / €0 on SH	No English certificate. Requires "at least 5 ECTS in the listed subject areas" — a marketing licence clears it trivially. Strongest 146 verdict in the report
BGE — MSc Marketing	Hungary, public	€6,600 / €0 on SH	IELTS 5.5 / Duolingo 95 — lowest test bar found
Tartu — MA Innovation and Technology Management	Estonia, public	€4,800	Entry by field, not credits. IELTS 6.0. "Analytics for Business" double degree with Ghent. <i>Note: Tartu abolished non-EU waivers from 2026/27</i>
Aalborg — MSc Economics & Business Administration	Denmark, public	€7,450	Business Data Science / Marketing & Sales tracks. ~15 fully-funded awards by automatic consideration. Denmark's credential assessment is free and legally binding. Non-EU deadline 15 Jan , not the 1 March EU date
USN — Master in Digital Transformation	Norway, public	€5,128	Information systems + change management — direct read-across from your CRM build. Best price-to-match ratio found. But see the Norway warning below

Programme	Where	Cost/yr	Entry & notes
INN — MSc Business Administration (Business Analytics)	Norway, public	€4,975	Cheapest Norwegian. 30-ECTS quantitative floor and a C-average you only just meet. Deadline 1 December 2026
UiA — International Business	Norway, public	€5,385	Norway assesses by years, so 146 is fine
NOVA IMS — Data-Driven Marketing & Analytics	Portugal, public	€3,750 (€7,500 total)	English. 2027/28 applications open soon
U. Łódź — Business & Digital Analytics	Poland, public	€2,500	English
SGH — Advanced Analytics / Big Data	Poland, public	€4,600	Poland's leading business school
VŠE — Economic Data Analysis	Czechia, public	€6,000	English
ULiège — International Strategic Marketing	Belgium, public	€5,369	French + English. French test exemption verified. Caution: publishes a minimum 12/20 — you clear it by nothing
KU Leuven — MSc Business Administration (Brussels)	Belgium, public	<=€9,494	60 ECTS, English, marketing tracks, qualitative entry wording, preparatory programme with no visa complication
MTU Cork — MSc Artificial Intelligence	Ireland, public	€11,000 net	Automatic €2,500 award — not competitive. Ireland gives 24 months post-study
ATU Sligo — MSc Business Analytics	Ireland, public	€14,000	Published RPL route
ASE Bucharest — MSc Customer Relationship Management	Romania, public	€4,500	Closest title match to your project. But Bucharest recruits in Romanian/English/German, not French — a fit play, not a cost play
UEF — Digital Marketing and Analytics	Finland, public	~€7,000 net	True Direction 1+2 hybrid
AUAS — Digital Driven Business	Netherlands, applied sci.	€10,648	Only if your diploma says <i>Licence Appliquée</i>
SDSI — Erasmus Mundus	FI/LV/EE	€0 if funded	No GPA floor, IELTS 5.5 , 5 scholarships reserved for countries including Tunisia. Your CRM build <i>is</i> service design

Tier B — needs Spanish, Italian or Portuguese

Programme	Where	Total cost	Notes
UCA — Dirección de Marketing Digital y Social	Spain, public	~€886	Admission weighted 35% academic record / 35% professional experience — the best weighting found anywhere for your profile. No language certificate published
US Sevilla — MUMIA	Spain, public	~€886	Marketing + empirical data; your licence is on the preferred list. ~4.3 applicants per place
UGR + UJA — Marketing y Comportamiento del Consumidor	Spain, public	~€886	Same cost but demands DELE B2 and English B1 — two certificates you lack
Torino — Direzione d'Impresa, Marketing e Strategia	Italy, public	€656/yr	Plus EDISU Piemonte €8,097 — the richest regional grant in Italy. Entry: <i>"titolo equipollente conseguito all'estero"</i>
Parma — Trade e Consumer Marketing	Italy, public	ISEE-scal ed	Contains a Loyalty Marketing and CRM module (10 CFU) — the closest curriculum match in Italy

Programme	Where	Total cost	Notes
Unimore — LM-59	Italy, public	€159.67	Open admission. Lowest bar in Italy: a listed bachelor's or just 30 ECTS in relevant subjects
U.Porto FEP — Mestrado em Marketing	Portugal, public	~€5,000	Eduuniversal 14th in W. Europe. Its <i>Marketing Relacional</i> module is literally CRM
Aveiro — Marketing e Comunicação Digital	Portugal, public	€4,150	2024/25 rate
UAB — Màrqueting	Spain, public	Catalonia rates	Spanish/Catalan

Direction 2 — Digital and growth marketing

Plenty of options and the cheapest degrees here. But read deliverable 6 first: a generic "digital marketing" job title is harder to sponsor than a technical one, so favour programmes with a data or CRM component.

The France trap — screen on two things, not one. IAE Lille, IAE Caen, Paris-Saclay and ISM-IAE Versailles all admit at **M1** from a licence with **zero tuition** — and all require a **signed French apprenticeship contract before enrolment**, which you cannot get before you hold a visa. A free programme you cannot enrol in is worse than a paid one. Every French entry below is confirmed **M1 entry and formation initiale**. Note the IAE catalogue's own "Initiale" filter over-reports — four programmes tagged *Initiale* are alternance-bound.

Tier A — apply now

Programme	Where	Cost/yr	Entry & notes
FH Kufstein — MA Digital Marketing	Austria, applied sci.	€727	No 180-ECTS rule; needs 30 ECTS business. IELTS 6.0. Deadline 3 March
IAE Gustave Eiffel — Master MMX (Marketing et Management de l'Expérience Client)	France, public	€4,055	Best CRM match in France. M1 from <i>Licence Économie et Gestion</i> ; M1->M2 automatic. M2 tracks: CRM et Data Marketing, IA et digital Marketing . Eduuniversal #3, 83% employed at 6 months. 24 places
IHECS — Master 120 publicité et communication commerciale	Belgium, private	€5,369	No entrance exam. B1 minimum. Data analytics, social platforms, UX, influence marketing. Best content-per-euro in Benelux
iaelyon (Lyon 3) — Master Marketing-Vente	France, public	€4,055	M1 from " <i>licence ou équivalent (180 crédits)</i> ". Trains "spécialistes de la relation client"
IAE Metz — M1 Marketing, Vente -> Marketing digital	France, public	€4,055	"Bac+3 (180 ECTS)". No Score IAE-Message — dossier and interview only. Lowest French barrier
IAE Bordeaux — Marketing Stratégique / Marketing et Communication	France, public	€4,055	Apprenticeship confined to M2 — the ideal structure: enter in formation initiale, take the funded second year once you hold a permit
IAE Aix — MSc 1 Management -> MSc 2 Marketing & Brand Management	France, public	€8,400 / 2 yrs	Admits international students holding bac+3 "or credits" — the most 146-friendly wording in France

Programme	Where	Cost/yr	Entry & notes
IGR-IAE Rennes — M1 Marketing	France, public	€4,055	"grade Licence (180 ECTS)". Formation initiale only, no alternance pathway — the cleanest file
IAE Saint-Étienne — Marketing et Stratégie d'Innovation	France, public	€4,055	Initiale only, no alternance at all
IAE Nice — Marketing Digital	France, public	€4,055	Entry test has no eliminating minimum , plus jury interview. Nice is the priciest non-Paris city (~€1,370/mo)
EM Strasbourg — e-Marketing et Stratégie Digitale	France, public	€254 + CVEC — €4,055	Part of Université de Strasbourg. AACSB + EQUIS , awards a <i>diplôme national de master</i> . The benchmark every private school must beat. Requires English B2 and DELF/DALF B2
IAE Amiens — Décisions marketing opérationnelles et digitales	France, public	€4,055	SEA/SMO, data marketing, AI
Grenoble IAE — M1 Marketing	France, public	€4,055	Three digital M2 exits
IAE Montpellier — M1 e-Marketing	France, public	€4,055	File plus oral interview , where your CRM project lands. City has free public transport
Paris Nanterre — Marketing Opérationnel International (parcours classique)	France, public	€4,055	FI and apprenticeship are separate parcours
ICHEC — Master en gestion de l'entreprise	Belgium, private	€5,369	Official 120-ECTS Belgian master. No language test requested. Long year-2 internship
UMons Warocqué — Master 120 sciences de gestion	Belgium, public	€5,369	Entry: " <i>minimum 3 years of higher education and/or 180 credits</i> " — disjunctive, the friendliest wording found anywhere. 6-year diploma-recency rule
UNamur — Master 120 sciences de gestion	Belgium, public	€5,369	31 March deadline for visa applicants. No ENIC-NARIC equivalence needed
UW — Digital Business (MA)	Poland, public	€7,500 total	B2 English met by UW's own free online test. Entry is a subject test, not GPA ranking
UTB Zlín — Marketing Communications	Czechia, public	~€2,700	Entry wording names <i>marketing</i> as qualifying. Recognition costs €39. Deadline 31 May
MERCURI — UE Katowice + 3 countries	Poland, public	€5,150 total	Customer-relationship marketing, triple diploma. Caution: literally demands "6 semesters and 180 ECTS"
University of Malta — MA Digital Marketing Communication	Malta, public	€9,500 total	Explicitly admits Third Class / Category III holders with relevant experience. IELTS 6.5. iGaming and fintech recruit in English; French is an asset
CUT — MSc Experiential Digital Marketing Communications	Cyprus, public	€7,500 total	Same fee regardless of nationality. But Cyprus applies a labour market test — treat as a cheap EU qualification, not a route to work
York St John — MSc Strategic Digital Marketing	UK	£11,800	Entry 2:2 — you clear it. February intake
Vilnius University — Marketing & Integrated Communication	Lithuania, public	€5,460	60% GPA threshold, but IELTS 6.5

Programme	Where	Cost/yr	Entry & notes
UL Ljubljana SEB — Marketing MA	Slovenia, public	€4,700	Triple Crown. Explicit 180-ECTS requirement -> BORDERLINE
NHL Stenden — IITEM	Netherlands, applied sci.	€11,995	Nearest Dutch equivalent to events/entertainment marketing. Deadline 31 May
Rotterdam UAS — Consultancy & Entrepreneurship	Netherlands, applied sci.	€14,449	Admits business bachelors with no work experience . IELTS 6.5, 1 April
IÉSEG — Digital Marketing & CX Management	France, private	€9,810 after early bird	€21,800 for the whole 120-ECTS degree. Triple crown, GMAT optional. Blocker: IELTS 6.5
EM Normandie — 2-year track	France, private	€10,400–11,960	Only AI x marketing hybrid at a triple-crown school. 10%+10% discount stack allowed

Tier B

Programme	Where	Total cost	Notes
UMA — Dirección y Gestión de Marketing Digital	Spain, public	~€886–900	90 ECTS. Revised down from €1,296 — a 99% Andalusian <i>bonificación</i> should zero year 2. Dedicated foreign-student enrolment phase in early July
Salerno — Digital Marketing (LM-77)	Italy, public	ISEE-scaled	Correction: requires Italian B1 from all applicants, including on the English curriculum — Tier B, not Tier A
UA Alicante — Comunicación Digital	Spain, public	Valencia rates (doubled for non-EU)	Partly blended

Tier C

Programme	Where	Cost	Notes
UTB Zlín — Marketingová komunikace (Mgr.)	Czechia	€0	Czech-taught is genuinely free — but the prep year costs €7,167 plus a lost year. Not recommended

Direction 3 — Music marketing and artist promotion

As a standalone, affordable, state-recognised master's, this direction essentially does not exist in Europe.

That is a finding, not a search failure. Fifteen independent sweeps looked — France, Italy, Spain, Portugal, Belgium, Netherlands, Luxembourg, Germany, Austria, Poland, Czechia, Hungary, Slovakia, the Baltics, the Nordics, Malta, Cyprus, Greece, and all 220 Erasmus Mundus programmes. Results: **zero** almost everywhere. The word "marketing" appears in **none** of the 220 EMJM titles. Germany returned **no hits at all** for Musikwirtschaft or entertainment.

Programme	Where	Cost/yr	Reality
Lyon 2 — M1 Management de l'innovation -> M2 Management Carrières d'Artistes / Écosystème de la Musique	France, public	€4,055	The only real route. Admits at M1 from "L3 économie et/ou gestion" with no credit numeral, then progresses internally to the music M2 — sidestepping France's M2-only trap

Programme	Where	Co st/yr	Reality
U. Silesia — Creative Management in New Media	Poland	€3,080	Hard fail — needs an arts/media bachelor plus a portfolio review

Music marketing exists in Europe as a *module inside* Direction 4 programmes, or as a *sector you enter* from a Direction 1 or 2 degree. It is not a degree you can go and buy.

Direction 4 — Music business and industry management

Thin, but real — and two options are genuinely good.

Programme	Where	Cost/yr	Entry & notes
Bologna — GIOCA	Italy, public	€157.04 with ISEE <=€27,000	120 ECTS <i>laurea magistrale</i> — a real state degree. Entirely English . Sits in a Management department. Entry: " <i>a Bachelor's or equivalent degree in any discipline of minimum three-year duration</i> " — years, not credits. 25 of 50 places reserved for non-EU applicants resident abroad . No portfolio, no GMAT. CV (40) + interview (60). <i>The €157 depends on obtaining an ISEE parificato</i>
UiA — Popular Music: Music Business and Management	Norway, public	€11,540	The only music-business master's you can enter on the qualifications you hold — admits on " <i>a bachelor's degree in economics or equivalent</i> ". No portfolio, no audition. But UiA offers no scholarships at all , and see the Norway warning
ULB — Master en gestion culturelle	Belgium, public	€5,369	French — no language test. 120 ECTS
UVSQ — MOCA (management route)	France, public	~€4,055	Its official <i>licences conseillées</i> list includes "Gestion"
Ca' Foscari — IMCC	Italy, public	ISEE-scaled	English. Direction 3/4 hybrid. But Ca' Foscari charges €1,300/yr flat and ISEE parificato is NOT valid there
EAMT / EBS — Cultural Management	Estonia	€6,000	5 scholarships. "Any field" entry . Case study + interview
Rennes SB — MSc International Music Business	France, private	~€11,950 net	€28,900 total less a €5,000 Talent award. RNCP 7 + CGE, triple-accredited. Stretch
Popakademie Baden-Württemberg — MA Music Business	Germany	€3,000	180 ECTS accepted, no grade bar , business degrees eligible, and no C1-German requirement or entrance exam (correcting an earlier record). Blocked by six months' creative-sector experience . German-taught

Country warnings that override the tables

Norway — effectively closed unless the family has cash. Tuition is cheap and the credential rules are the friendliest in Europe. But you must demonstrate **NOK 170,368 (~€14,600)**. UDI accepts a loan or grant letter — except **no Norwegian institution offers one**: Nord "does not offer scholarships or grants", INN is "legally barred", UiA "does not offer any scholarships for 2026/2027", and there has

been no national scheme since 2016. The only instrument is the Tunisian student loan, which **requires you to already be enrolled abroad**. That is circular.

Germany — one trap to check. The German Embassy in Tunis requires a **"Certificat d'admission inconditionnel"** for the visa. That **collides with the conditional-admission routes** several good programmes use to bridge 180->210 credits. Confirm before relying on one. Also, under **Vergabeverordnung NRW**, admission-restricted programmes in Cologne, Bonn, Münster and Aachen may reserve as few as **2 places for non-EU applicants**, needing a CGPA around 1.0–1.3. Conversely **Osnabrück reserves 50% of places for non-EU**. Ask "is it admission-restricted and what is the non-EU quota?", not just "what is the minimum grade?".

Spain — the 1 November rule is an opportunity, not a penalty. Andalucía is the only community that **explicitly names the study permit as exempting** you from the non-EU surcharge, and it is satisfied by a mere **"resguardo de haberlo solicitado"** — a receipt showing you applied. Cataluña's decree explicitly says the permit does **not** exempt. Andalucía's Article 18 access route also appears to cost **€0**, against Cataluña's €218 and France's €120 with a 4–6 month wait.

Italy — two fee regimes, and the second is safer. Besides the ISEE route (cheapest, but needs Tunisian documents legalised at the embassy against an autumn deadline), there is a **flat rate assigned automatically from Tunisia's World Bank income band — no paperwork, no deadline risk** — and Tunisia sits in the lowest band nearly everywhere. **Watch Milano Statale: ~€3,394/yr, Tunisia is Group C and ISEE parificato is explicitly forbidden** — ten times Bicocca's price across the same city.

Belgium — carry one free document. ULiège's French-test exemption is verified; ULB and UCLouvain appear to accept a university attestation certifying French-medium instruction; UNamur and UMONS show none. **Get a free FSEG attestation confirming French-medium instruction and attach it to every Belgian application.** UCLouvain also publishes a pre-application assessment route: lsm-belgian-admissions@uclouvain.be.

Luxembourg, Switzerland, Greece, Sweden — closed. Luxembourg has no marketing, communication or music master's at all, and its one adjacent option states "180 ECTS" three times with no fallback. Switzerland requires "at least 3 years, at least 180 ECTS", applied strictly. Greece demands **C2 English** and routes foreign degrees through DOATAP, exactly where 146 gets challenged. Sweden's fees are €9,000–17,100 and **Tunisia is not among the Swedish Institute's 34 eligible countries**.

Excluded — checked, and not what they appear to be

What	Why
Every Italian "music business master" — LUISS BS, Sapienza MMCM, Roma Tre, IULM, 24ORE, Saint Louis College of Music	All <i>Master di I livello</i> : 1 year, 60–65 CFU. Not second-cycle degrees. Saint Louis is genuinely AFAM-accredited but its music-business master is still I livello
Every Spanish "máster en industria musical" — UC3M, IL3-UB, UAM, SAE	<i>Formación permanente / título propio</i> . Not state master's, and likely fail the EQF-6 test for Spain's own post-study permit
Every French <i>Mastère Spécialisé</i>, without exception	CGE rules require Bac+5 (or Bac+4 + 3 years' experience). You hold Bac+3. Not a <i>diplôme national</i> ; confers no <i>grade de master</i> . Warning: ESART advertises one without CGE membership, on an RNCP registration expiring 31 Aug 2026
Coimbra Business School music-industries course	<i>A pós-graduação</i> , not a master's
Berklee Valencia	~€48,000
Uniarts Helsinki — MA Music Business	Perfect subject fit; €28,000/yr with a verified zero-scholarship position
UK music-business master's	£16,000–31,900. Only Westminster survives as a stretch

What	Why
Popakademie, BIMM, Catalyst Berlin, SAE, ICMP	Accreditation, price, or both
Rome Business School	Awards a Spanish <i>título propio</i> , not an Italian degree
EU Business School	Rated H- by Germany's anabin
BSBI Berlin · IMB Barcelona	Awards no German degree · EUNEIZ <i>título propio</i>
ISEG	RNCP titles valid, but no <i>grade</i> , no <i>visa</i> , not CGE, no AACSB/EQUIS/AMBA, ~€10,150/yr, and its bac+5 tracks are alternance-only
ESSCA	Requires a 4-year bachelor or 3 years' experience
UGent — Marketing Analysis	An advanced master requiring a bachelor and a master's
Queen's Belfast (£23,000), Ulster (£18,310)	Northern Ireland is not the cheap UK route it appears to be
All AI/data Erasmus Mundus programmes · EMMIE	Every one requires a CS/engineering/math degree · EMMIE needs 240 ECTS
Finnish universities of applied sciences	Require 2 years' relevant work experience
Flemish hogescholen / French <i>hautes écoles</i>	Award no business master's (Flanders) or marketing only at bachelor level (Wallonia). The applied route in Belgium is ICHEC and IHECS only
Saxion MBA	Part-time — no student visa
IAE Lille, IAE Caen, Paris-Saclay, ISM-IAE Versailles	Free and M1-entry, but alternance-mandatory — unobtainable pre-visa
KTU marketing / big data · MRU Communication & Digital Marketing	Lithuanian-only · is a bachelor
German Studienkolleg	Bachelor entry only

What is still unverified

Being straight about the boundary of this list.

- **France, Italy and Spain have no working national catalogue.** France's is dead, Italy's 404s, Spain's is JavaScript-only. Those three are systematic institution-by-institution coverage — much better than a sample, but not a census. The **IAE network is a census** (all 106 catalogue pages, 921 programmes, 37 schools).
- **Unreached:** 16 Italian universities (listed in the research file); 7 Spanish autonomous communities' rates; FH St. Pölten and FH Vorarlberg; UiT Norway; KU Leuven's business fee band; VUB and UHasselt; BUas; TalTech and Tallinn University; Croatia's local-language databases.
- **German-taught programmes at smaller Fachhochschulen are under-swept** — Hochschulkompass's advanced search blocks automated access.
- **Almost every 2027/28 deadline is unpublished.** GIOCA's listed rounds are March/April 2026 and are **stale**. FH Kufstein's 3 March is confirmed for 2026/27 and has passed. **Treat every date here as an indication of when in the year to look, not a deadline to diarise.**

4. Your shortlist — the twelve worth your effort

Reordered after the full European sweep. Three options that were not in the first version now sit at the top, and one country has dropped off entirely.

What changed, and why it matters

The first version of this shortlist opened by telling you that your **missing English test was the binding constraint** on everything, and that **Germany was effectively closed**.

Both are now wrong, and I'd rather correct them plainly than let them stand:

- **Three good programmes take you with no English certificate at all** — one AACSB-accredited and free, one triple-accredited.
- **Germany is roughly 50/50, not closed**. Of 42 German programmes read in full, **23 publish no grade requirement whatsoever**.
- **Norway has dropped off**, despite cheap tuition and the friendliest credential rules in Europe. The reason is below.

You should still sit IELTS — it opens far more doors and costs about 700 TND. But **you are no longer blocked from applying for autumn 2027 while you wait for a score**.

The top three

1. EUBA Bratislava — MSc Marketing and Trade Management (Slovakia)

€0 tuition • English • AACSB-accredited

The strongest single option found anywhere, because it removes every one of your obstacles at once.

Tuition is €0. Slovakia levies **no differential fee for non-EU students at all** — a fee schedule showing €2,500 caused confusion, but that rate applies only to students exceeding the standard duration. Application costs €90.

No English test at any stage. No written entrance exam either — CV, motivation letter, online interview.

Entry wording is "a bachelor degree in the field of economics and management, or in a related field" — no credit count anywhere, so your 146 is a non-issue.

And the scholarship is designed for someone in your position. Slovakia's *Scholarships for Talented Students* pays **€5,000/year x 2 = €10,000**, is open to any non-Slovak citizen with no age limit, and this exact programme is on the eligible list. The Ministry's own methodology states that for foreign applicants the **SAT result is "the only evaluation criterion for constructing the ranking"**. Your GPA is **never consulted**. Minimum 1100, no section minimum.

Your two worst weaknesses — a modest transcript and no English test — become **one solvable task**.

Living costs €260–718/month on the university's own figures, a 9-month post-study job search, and Bratislava's shared-services sector actively recruits **native French plus English**.

2. HWR Berlin — MA International Marketing Management (Germany)

Tuition-free • 100% English • IELTS 6.0

The complete official requirement list contains **no grade at all**. And it is the only programme in Europe that solves your credit question in writing:

"Applicants with 180 credits will be required to obtain the additional 30 credits... by completing a placement in the third semester."

A paid German placement that also closes the credit gap. **IELTS 6.0 is the lowest test threshold in this report.**

Risk: their own FAQ says selection is grade-weighted for 35 places. So no grade *bar*, but grades still rank. Apply, don't rely.

3. Corvinus — MSc Marketing (Hungary)

€7,400/yr, or €0 with Stipendium Hungaricum • AMBA + AACSB + MAB

"There are no specific English language requirements... assessed as part of our entrance exam process." A triple-accredited business school that will assess your English itself.

The strongest 146 verdict in the report. Hungary has no total-credit rule — entry runs on subject-area minimums, and Corvinus asks for *"at least 5 ECTS credits in the listed subject areas."* A marketing licence clears that trivially.

Tunisia holds a 250-place Stipendium quota, and the entitlement is *"Full degree master studies: in any field of interest"* — no field restriction.

Apply through Stipendium regardless of your odds: doing so triggers an **automatic 20% discount** even if you don't win, and a 10% early-bird stacks on top. Caveat: the stipend is ~€110/month against €600–800 Budapest costs — a free degree, not a free life.

The strong middle

4. Bologna — GIOCA (Italy)

€157.04/year with ISEE • English • 120 ECTS

Still the only good way to study the culture industry without giving up a management qualification. A real *laurea magistrale*, in a **Management** department, entirely in English, with **25 of 50 places reserved for non-EU applicants resident abroad**. No portfolio, no GMAT.

Entry: *"a Bachelor's or equivalent degree in any discipline of minimum three-year duration."* Years, not credits.

Two conditions. The €157 assumes you obtain an *ISEE parificato* — otherwise a different fee schedule applies. And note Italy has a **second, no-paperwork route**: a flat rate from Tunisia's World Bank income band, with no legalisation and no deadline risk. **Pavia (€390) and Bicocca (€346) are nearly as cheap that way**, without the paperwork risk.

5. KU Eichstätt-Ingolstadt — MSc Digital Customer Experience & Service Design (Germany)

€88/semester • English • Dual degree with Toulouse

"Open to all students who pass the aptitude procedure" — no grade floor, with bonus points for internships and prior knowledge. The subject is Directions 1 and 2 combined, and your CRM build is exactly the evidence rewarded.

It requires French A2. You are a native speaker — a stated requirement that becomes a competitive advantage. Only 10 places.

6. FH Kufstein Tirol — MA Digital Marketing or MA Data Science & Intelligent Analytics (Austria)

€726.72/year • English • Deadline 3 March

Austrian applied-sciences law contains **no credit count**; Kufstein asks only for 30 ECTS in business subjects. Afterwards: a 12-month job-search permit, then a **Red-White-Red Card with no points test and no labour-market test** — which matters when your GPA is modest, because nothing scores you.

The Data Science version is arguably the better one — same fee, same entry regime, and it publishes a **free video preparatory course** for the maths prerequisite. Since the job title on your contract decides your visa, a data-titled master's at €727 is a strong card.

Correction from the first version: you *cannot* skip the English test here. Kufstein accepts a medium-of-instruction letter only where it demonstrates "*CEFR level B2 or higher*", and a letter from a French/Arabic-medium faculty shows the opposite. **IELTS 6.0 / TOEFL 72 / PTE 60; Duolingo rejected.**

Don't assume "Austria" is cheap either — fees across Austrian FHs run from €363 to €8,250 **per semester**. MCI Innsbruck at €16,500/year fails the filter outright.

7. IAE Gustave Eiffel — Master MMX, Marketing et Management de l'Expérience Client (France)

~€4,055/year • French • M1 entry

The best CRM match in France, found only once the IAE network was searched exhaustively. Admits at **M1** from a *Licence Économie et Gestion*, progresses to M2 automatically, and its M2 tracks are literally **CRM et Data Marketing** and **IA et digital Marketing**. Eduniversal #3 nationally, 83% employed at six months, 24 places.

Alternatives from the same sweep: **IAE Metz** requires **no Score IAE-Message** at all — the lowest French barrier. **IAE Bordeaux** confines the apprenticeship to M2, so you enter in formation initiale and take the funded second year once you hold a permit. **IAE Aix** admits on bac+3 "*or credits*".

The French trap: several free M1-entry programmes require a **signed apprenticeship contract before enrolment**, which you cannot get pre-visa. Screen for **M1 entry and formation initiale**.

8. UCA Cádiz — Dirección de Marketing Digital y Social (Spain)

~€886 for the whole degree • Spanish (Tier B)

Admission is weighted **35% academic record / 35% professional experience** — the most favourable weighting found anywhere for someone with a modest transcript and a real project. No language certificate is published.

Realistically a 2028 entry, since there are **zero English-taught official master's at Andalusian public universities**. But Spanish is the fastest new language for you, and Andalucía is the only region that **explicitly names the study permit as exempting** you from non-EU surcharges — satisfied by a receipt showing you applied.

9. Aalborg — MSc Economics & Business Administration (Denmark)

€7,450/year • English

About **15 fully-funded government scholarships** — tuition waiver plus DKK 11,225/month — awarded by **automatic consideration**, with no residence bar for a Tunisian applying from Tunisia. The agent's phrase: *zero marginal cost to try*.

Denmark's credential assessment is **free and legally binding on universities**, making it the best place in Europe to have a 146-credit question. **Non-EU deadline is 15 January**, not the 1 March date published for EU applicants — an easy and expensive thing to get wrong.

The funded long-shots

10. SDSI — Service Design Strategies and Innovations (Erasmus Mundus)

Fully funded, €33,600 · IELTS 5.5

Still your most realistic Erasmus Mundus target: accepts Business/Administration backgrounds, **no GPA floor**, the lowest English requirement in the catalogue, and **5 scholarships reserved for countries including Tunisia**. Your CRM platform is service design.

11. IHECS — Master 120 publicité et communication commerciale (Belgium)

€5,369/year · French · No entrance exam, B1 minimum

The best content-per-euro in Benelux — data analytics, social platforms, UX and influence marketing — with **no entrance exam** and a B1 language bar. In French, so no test friction at all.

Bring one free document to every Belgian application: an FSEG attestation confirming French-medium instruction. ULiège's exemption is verified; ULB and UCLouvain appear to accept it. UCLouvain will also assess your file before you apply: lsm-belgian-admissions@uclouvain.be.

12. Stipendium Hungaricum (Hungary)

Tuition-free + stipend + accommodation

Tunisia's 250-place quota and unrestricted field entitlement make this realistic rather than a long-shot. Worth applying to for the automatic Corvinus discount alone.

Norway — why it dropped off

This is worth explaining, because on paper Norway looked ideal: tuition of €4,975–5,385 after the fee repeal became law in August 2026, and a credential rule that assesses **years of study**, dissolving your 146 problem outright.

It fails on **liquidity, not cost**. You must demonstrate **NOK 170,368 (~€14,600)**. UDI accepts a loan or grant letter — but **no Norwegian institution offers one**: Nord "does not offer scholarships or grants", INN is "legally barred", UiA "does not offer any scholarships for 2026/2027", and there has been no national scheme since 2016. The only instrument is the Tunisian student loan, which **requires you to already be enrolled abroad**.

That is circular. **Unless your family can show €14,600 in cash, Norway is closed** — including UiA's Popular Music Business master's, otherwise the only music-business degree in Europe you could enter as you stand.

If cash is the constraint, Portugal is the answer instead of Norway. No such wall, and U.Porto's FEP Mestrado contains a *Marketing Relacional* module that is literally CRM.

Also deliberately not here

The UK — three institutions wide, and the post-study route is **18 months** for your cohort, not two years. **Sweden** — Tunisia is not among the Swedish Institute's 34 eligible countries. **Finland** — a full-cost tuition law took effect 1 August 2026 and scholarships are no longer granted to incoming fee-liable applicants. **Luxembourg, Switzerland, Greece, Cyprus** — no suitable programme, an explicit 180-ECTS rule, a C2 English demand, and a labour market test respectively.

The honest ranking of your four directions

Direction 1 (AI/data marketing) >> Direction 2 (digital marketing) > Direction 4 (music business) > Direction 3 (music marketing).

Direction 3 barely exists — fifteen independent sweeps found two options in all of Europe.

The music sector is also structurally hard to sponsor: **31.6% of EU cultural employment is self-employment** against 13.7% economy-wide, and there are 2.1 million cultural enterprises for 8.9 million cultural workers — about four people per firm. In the UK the **median** musician earns £37,500 and the median arts producer £38,100 against a £41,700 permit floor. Those are mid-career figures.

Treat music as a sector, not a degree. The sponsorable door is a data or CRM role at Spotify, Deezer, Believe or Universal — reached through Direction 1.

One exception worth knowing: the **Billboard France x Amazon Music bourse** fully funds a year of a master's in France, and **financial need is a key criterion while grades are not a published criterion at all**. It is the only music-specific funding found in the entire project, and the one place your self-taught production counts in your favour.

5. Funding

Rewritten after the full European sweep. Checked August 2026.

The short version

You are essentially self-funding, and that is survivable — because the cheapest real degrees in Europe cost €0–900 for the whole thing. The strategy is not to win a big scholarship. It is to **pick a country where tuition is near zero and then cover living costs**, with a scholarship as upside.

Two things to fix in your head before reading on:

1. **The Tunisian government grant is closed to you.** We led with it in an earlier draft and were wrong — the reasoning is below.
 2. **The real barrier is not tuition. It is the visa deposit** — France ~€14,500, Norway ~€14,600, Germany €11,904 — and almost nothing here can be used to satisfy it.
-

The single best funding opportunity: Slovakia

Scholarships for Talented Students — €5,000/year x 2 = €10,000

- Open to **any non-Slovak citizen**, no age limit
- **EUBA's MSc Marketing and Trade Management is verified on the eligible list**
- Tuition at EUBA is already **€0**, so this is money for living costs
- Applied for **after enrolment**, so you fund the first weeks yourself
- Roughly **September 2027**; 20 master's places ring-fenced for Bratislava-region institutions

Why this one matters more than anything else here. The Ministry's methodological document states that for foreign applicants the **SAT (or SCIO) result is "the only evaluation criterion for constructing the ranking."** Your GPA is never consulted. No English certificate is required. Minimum SAT 1100, no section minimum.

Every scholarship in Europe screens on things you are weak at. This one screens on a test you can go and sit.

Second: Italy's fee system beats most scholarships

No competition, no panel, no deadline race — just means-testing, and on a Tunisian income you very likely qualify.

- **Bologna: ISEE ≤ €27,000 → tuition €0, total ~€157/year**
- **Unimore: €159.67 · Bicocca: €346 · Pavia: €390 · Torino: €656**
- **Sassari waives year one entirely**

And there is a second route nobody had found. Besides ISEE — which needs Tunisian documents legalised at the Italian Embassy against a hard autumn deadline — Italy also assigns a **flat rate automatically from Tunisia's World Bank income band. No paperwork, no deadline risk**, and Tunisia sits in the lowest band nearly everywhere. **Pavia and Bicocca are the cheapest no-paperwork routes in Europe.**

! Milano Statale is the exception: ~€3,394/year, Tunisia is Group C, and ISEE parificato is explicitly forbidden — ten times Bicocca's price in the same city.

Correction: ER-GO is not special

An earlier draft presented ER-GO's **€7,171** as an Emilia-Romagna advantage and a reason to favour Bologna. **It is the national minimum every Italian region must match.**

EDISU Piemonte beats it: €8,096.78, plus **€6m ring-fenced for non-EU students** with ISEE <= €13,153 and **15% of first-year beds reserved for extra-EU students with family abroad**. Turin is better funded than Bologna, not worse.

Deadline calendar

When	What	Type	Odds
1 Dec 2026	INN Norway application	—	Most urgent date found
Oct–Dec 2026	Erasmus Mundus 2027 wave opens	Full funding	Varies
~Nov 2026	Stipendium Hungaricum opens	Tuition + stipend	Realistic
Early Nov 2026	File Denmark's free credential assessment	Enables Aalborg	Must do
~8 Jan 2027	Eiffel — your university must deposit your file	Full funding + fee exemption	Long-shot
~15 Jan 2027	Aalborg non-EU deadline (not 1 March)	~15 full awards, automatic	Realistic
~15 Jan 2027	Stipendium Hungaricum closes	Tuition + stipend	Realistic
~15 Jan 2027	Campus France closes	Mandatory gate	Must do
~26 Jan 2027	Corvinus Early Bird (10%, automatic)	Discount	Automatic
Jan–Feb 2027	Most Erasmus Mundus deadlines	Full funding	Varies
16 Feb – 31 Mar 2027	Romania MFA	Fully funded	Stretch
Feb 2027	CLIDE opens — latest EMJM window	Full funding	Realistic
Feb 2027	Re-check Malta's ODA course list — it resets annually	Full tuition + €1,300/mo	Worth a look
1 Mar 2027	Aalborg scholarship consideration	Automatic	Realistic
3 Mar 2027	FH Kufstein deadline	—	—
~26 Mar 2027	MAECI Italy	€10,800 / 9 months	Realistic–stretch
1 Apr 2027	Vilnius fee waiver (5 places)	Waiver	Long-shot
~May 2027	NAWA Banach, Poland	Tuition + PLN 2,500/mo	Realistic
23 Jun – 24 Aug 2027	ER-GO / EDISU regional grants	€7,171–8,097/yr	Realistic
~15 Jul 2027	Billboard France x Amazon Music	Full year, French institution	Stretch
~Sept 2027	Slovakia Talented Students	€10,000	Realistic
2 Sep – 1 Oct 2027	Estonia Harno (€350/mo)	Stipend	Stretch
~30 Oct 2027	ISEE filing, Italy	Fee exemption	Must do
1 Nov 2027	Andalucía authorisation receipt	Triggers the low fee	Must do
Oct–Dec 2027	Tunisian MESRS <i>prêt</i> — after you arrive	€120–145/mo loan	Realistic

The realistic list, ranked

- 1. Slovakia Talented Students — €10,000.** Covered above. Screens on the SAT, not your GPA.
- 2. Stipendium Hungaricum.** Tunisia holds **250 places**, entitlement is "*in any field of interest*". Covers tuition entirely plus dormitory. Stipend **HUF 43,700 ~ €110/month** plus ~€100 housing — the Call itself admits it "does not fully cover all the living costs." (Figures of HUF 200,000 online are the **PhD** rate.) **Apply even if pessimistic: it triggers an automatic 20% Corvinus discount regardless of the outcome.**
- 3. NAWA Banach, Poland.** Tunisia eligible, **no field restriction**, tuition exemption plus **PLN 2,500/month** and a PLN 2,500 travel allowance — a genuinely liveable stipend, unlike Hungary's.
- 4. Aalborg, Denmark.** ~15 fully-funded awards — tuition waiver plus **DKK 11,225/month** — by **automatic consideration**, no residence bar. Zero marginal cost to try.
- 5. Erasmus Mundus SDSI and CLIDE.** Tuition plus ~€1,400/month, max €33,600. SDSI has **no GPA floor, IELTS 5.5, and 5 places reserved for countries including Tunisia**. Note the €1,400 *includes* travel and installation, and awards are capped at ~10% per nationality — you compete against other Tunisians, not the world.
- 6. Regional Italian grants.** EDISU Piemonte €8,097 or ER-GO €7,171, stacking on near-zero tuition.
- 7. Billboard France x Amazon Music.** Funds one full year at a French institution, two awards annually. **Financial need is a key criterion; grades are not a published criterion at all**, and extra-curricular music is valued. The **only music-specific funding found in the entire project**, and the one place your self-taught production helps. Nationality conditions unpublished — email bourse@fr.billboard.com.
- 8. France's Eiffel.** €1,200/month for 24 months plus **automatic tuition exemption** worth another €3,950/year. **You cannot apply — your university must nominate you.** So the action is to ask each French international office **in writing, early**, before their internal selection closes. Long-shot on merit, but the ask is free.

The Tunisian instruments — what's true

The grant is closed to you

We led with this in an earlier draft. Verified against **Circulaire 61/25 of 23 October 2025**:

Condition	Reality
Grants for the whole EU	10 in total
Eligible fields	Energy transition, Industry 4.0, AI only
Minimum average	12.5/20 , not the 12/20 first reported
Record	No failed or repeated year, ever
Age	<=24 on 1 September
Status	Must be currently enrolled in year 3 — graduates excluded
Master's abroad	Must be a research master's

You fail at least five. (The amount is now €1,000/month under a July 2026 order — so anything quoting €800 is stale.)

The loan exists, but arrives too late to matter most

Nothing in the *prêt universitaire à l'étranger*'s conditions excludes you — no age bar, no field bar, no grade floor. From the JORT: **5,000 TND/year for Europe, 6,000 for France and Germany** (~€1,450–1,750/year, about €120–145/month). Repayment over ten years starting two years after the last disbursement. Means-tested, competitive, and requires a guarantor's *cautionnement solidaire*.

The catch is structural: it is for students *already enrolled abroad*. Applications open in late October and close in early December. So: admission spring 2027 -> arrival summer 2027 -> apply October 2027 -> **money in 2028. It cannot fund your visa deposit or first-year costs**, which is the barrier that actually decides where you can go.

Currency controls are not a problem. BCT circulaire 10-2025 permits 6,000 TND installation plus **4,000 TND/month** living costs plus tuition at invoice.

Bank study loans are effectively closed unless a *Plan Épargne Études* already exists, opened around 2024 (BIAT, STB, Amen, BT all require this). Otherwise the fallback is an ordinary parental loan.

Verified closed — do not chase

Scheme	Why
AUF (Agence universitaire de la Francophonie)	We flagged this as a strong prospect because you are francophone. Wrong, and structurally so — its student instruments are distance degrees, a doctoral scheme, and competitions. No AUF scholarship funds an individual's physical master's mobility to Europe
Norway — every institution	Nord "does not offer scholarships or grants"; INN "legally barred"; UiA "does not offer any scholarships for 2026/2027"; no national scheme since 2016
Swedish Institute	Tunisia is not among its 34 eligible countries (Egypt and Morocco are)
Austria — Ernst Mach / Erhard Busek	Ernst Mach does not fund full FH degrees; Erhard Busek is suspended . Cost Austria as self-funded
Islamic Development Bank	M.Sc. programme is Least Developed Member Countries only — Tunisia is not one
African Development Bank	Tunisia eligible, fields fit — but it funds study at African universities
OFID	Programme suspended
AFESD	PhD holders only
Mastercard Foundation	In Europe only Sciences Po, Oxford, Cambridge — all too selective
Aga Khan ISP	No Tunisia office
Qatar Foundation · Kuwait Fund	Doha only · sovereign lender, no student scheme
Chevening · DAAD EPOS	Both need 2 years' work experience — around 2029 for you
Erasmus+ KA171 · EIT Digital	3–6 month exchange, university applies · requires a technical bachelor — a marketing licence disqualifies
Lithuania · Slovenia · Croatia · Cyprus state schemes	Tunisia not listed; Cyprus requires 30 months' prior residence
Tartu waivers	Abolished from 2026/27
Malta ODA	Tunisia-specific and generous (€1,300/mo + full tuition) — but this year's eligible-course list is four science and humanitarian degrees. Re-check in February 2027
Istituto Italiano di Cultura Tunisi	States it administers no scholarships of its own

Empty categories, stated honestly: no Tunisian foundation or employer scheme exists, and there is **no marketing-specific scholarship for non-EU students anywhere in Europe**.

Still unverified

- The MESRS loan's **interest rate** — no governing text states one, but the CNSS loan charges 5%, so do not assume free. The parental income ceiling PDF would not load.
- **Billboard x Amazon Music nationality conditions** — unpublished.
- MAECI's Tunisia beneficiary status for 2027; AECID's possible public-employee restriction.
- Exact 2027 dates for most schemes — the calendar uses this cycle as an indication. **Re-check every date before relying on it.**

6. What to do, and when

Working backwards from an autumn 2027 start. Today is 17 August 2026, so you have about thirteen months.

Do these four things in the next two weeks

Everything else depends on them, and all four are free or cheap.

1. Read your diploma and answer two questions

Does it say *Licence Fondamentale* or *Licence Appliquée*? This decides whether the Netherlands is open or closed to you, and nothing else will tell you.

Do you hold the actual diploma, or only a transcript? This is the one scenario where your 146 credits would be a real problem rather than a bookkeeping artefact — because 180 credits come automatically with the awarded degree. We put this at about 5% likelihood, but it needs confirming, not assuming.

2. Book IELTS Academic — and know that it no longer blocks you

Earlier versions of this plan called the missing English test your single binding constraint. **That is no longer true**, and the correction matters for your timetable.

Three good programmes take you with no English certificate at all: EUBA Bratislava (free, AACSB, no test at any stage), Corvinus Budapest (triple-accredited, internal entrance exam), and Bergamo (B2 satisfied by 6 ECTS of English in your bachelor's). IHECS Brussels asks only B1, and BGE Budapest accepts IELTS 5.5.

So **you can apply for autumn 2027 while your score is still pending**. Book the test anyway — it opens far more doors for ~700 TND.

You can sit it **in Sousse**, for roughly 700 TND. Target **6.5**, which unlocks essentially everything on your shortlist at once. At 6.0 you still have options; at 5.5 you can reach the best Erasmus Mundus target (SDSI).

But there is no waiver at most institutions, and the one that looked promising doesn't work. FH Kufstein does accept medium-of-instruction letters — but only where the letter demonstrates "*CEFR level B2 or higher*", and a letter from a French/Arabic-medium faculty demonstrates the opposite. Kufstein needs **IELTS 6.0 / TOEFL 72 / PTE 60**, and explicitly rejects Duolingo.

3. Email FSEG Sousse

Ask the *scolarité* for two documents:

- A written **attestation on letterhead** stating your Licence comprises **180 credits over six semesters and three years**, and that it grants access to Mastère study in Tunisia.
- The **supplément au diplôme** (Diploma Supplement).

Both are free. Together they neutralise the "146" objection almost everywhere. The risk you actually face is an admissions officer rejecting your file on sight of that number before a qualified evaluator ever reads it — this is what prevents that.

4. Run the free credential checks

- **NARIC Ireland** — free comparability check. Do this before spending an Irish application, since Ireland is your genuine borderline case.
- **Denmark's assessment** — free, and legally **binding on Danish universities**.

Do **not** buy the French ENIC-NARIC evaluation yet (€120, and four to six months). Only order it if a specific programme demands it — and if you decide you need one, order by **late 2026**, because it cannot be rushed.

Your language strategy — commit to one, and only one

The brief was right to warn against spreading across several languages. Here is the recommendation.

For 2027: English only. Apply to Tier A programmes.

No new language reliably unlocks a 2027 intake. Starting Spanish part-time in September 2026 gets you a certified B2 somewhere between November 2027 and January 2028 — after the intake has begun. Only a full-time 25-hour-a-week course would reach B2 by March 2027, and that means giving up a year of earning to chase a saving you can get elsewhere.

So: run the 2027 cycle on **English and French programmes only**. That is where your shortlist already lives.

If you commit to a language, make it Spanish — for 2028

Spanish and Italian are equally fast for a French speaker (roughly 13–15 months part-time, 4.5–5.5 full-time). **Spanish wins on three tiebreakers:**

1. **Job-market reach** — Spain plus Latin America, versus Italy alone.
2. **Your music interest** — Madrid and Barcelona are the European hub of the Latin music market, which is the fastest-growing segment of the global industry.
3. **Logistics** — you can sit the **DELE B2 in Tunis** for 260 TND, with a published 2026 calendar. The Italian institute's page still shows 2024 dates and no fees.

Do not learn German, Czech, Polish or a Nordic language. German takes 22–28 months part-time — and you do not need it: the three open German programmes (HWR Berlin, KU Eichstätt, HM München) are **English-taught**. Czech and Polish take three years or more. The economics never work.

One honest caveat: if you end up at Bologna (GIOCA), Italian becomes the more useful language and you should switch. Decide after your admissions results, not before.

The timeline

Now – September 2026

- Read your diploma; confirm you hold it
- Book and schedule IELTS
- Request the FSEG attestation and *supplément au diplôme*
- **Register for the SAT if Slovakia interests you.** Slovakia's €10,000 scholarship ranks foreign applicants on the **SAT result alone** — your GPA is never consulted and no English certificate is required. Minimum 1100. It is the only scholarship found in Europe that screens on something you can go and change.
- **Budget for the visa resource requirement, not just tuition** — France now needs ~€14,500 demonstrated for year one, Norway ~€14,600, Finland €9,600. This is the real barrier, and it needs planning months ahead
- Run NARIC Ireland's free check
- Start Spanish **only if you're targeting 2028**
- Publish your CRM project properly (see below)

Urgent — before December 2026

- **1 December 2026: INN Norway deadline** — the earliest hard date found anywhere (though see the Norway funds warning in deliverable 4)
- **Early November 2026: file Denmark's free credential assessment** — it takes 1–2 months and Aalborg's **non-EU deadline is 15 January**, not the 1 March date published for EU applicants

October 2026

- **~Oct: Tunisian MESRS circular.** The **grant** is closed to you — verified against Circulaire 61/25, which offers 10 EU places in STEM fields only, caps age at 24, and requires current enrolment in year 3. Ask FSEG about the **loan** version only
- **~1 Oct: Campus France Études en France opens.** Mandatory for French applications. Fee 400 TND. Book the interview early — it can be done in Sousse
- **~1 Oct: Eiffel campaign opens.** You cannot apply yourself — **ask each French university's international office, in writing, whether they will nominate you**, and ask before their internal selection closes
- Erasmus Mundus 2027 applications begin opening
- Sit IELTS if not already done

November – December 2026

- **Stipendium Hungaricum call opens (~Nov)** — Tunisia holds a 250-place quota
- Erasmus Mundus applications: **SDSI first**, then others
- Order the French credential evaluation **only if** a target programme requires it — it takes 4–6 months
- Draft your motivation letters (see the framing advice below)

January – March 2027

- **~8 Jan: Eiffel deposit deadline** — your university must have filed by now
- **~15 Jan: Stipendium Hungaricum closes**, 14:00 CET
- **~15 Jan: Campus France closes.** Earlier than the universities' own deadlines. Missing it removes France entirely
- **Jan–Feb:** most Erasmus Mundus deadlines close
- **Feb: CLIDE opens** — the latest EMJM window, useful if your IELTS came late
- **3 Mar: FH Kufstein deadline** — your cheapest and most open option. Do not miss this one
- **~26 Mar: MAECI (Italy)** — needs a B2 certificate

Spring – Summer 2027

- University decisions arrive
- **~May: NAWA Banach (Poland)** — Tunisia is explicitly eligible, no field restriction
- Apply for individual fee exemption in France on means grounds, if admitted
- **Jun–Aug: ER-GO grant window** (23 Jun – 24 Aug) if you're going to Bologna
- **~Jul: AECID África-Med (Spain)** — verify the public-employee restriction first
- Start the visa process. Budget for proof-of-funds requirements — these are large and catch people out
- Arrange the *ISEE parificato* if Italy

On arrival, autumn 2027

- **Italy: file the ISEE by ~30 October**, or you pay a €100 penalty and land in the top fee band
- **Spain: file proof of your student authorisation before 1 November**, or you can be billed up to the full real cost of the course

Your profile — honestly assessed

What's genuinely strong

The CRM platform. It is the best thing you have, by a distance. You designed and built a working system for customer retention, vehicle tracking and automated service reminders. That is a real technical artefact, and almost no marketing applicant has one.

It also happens to be *exactly* what the most sponsorable jobs are looking for — and it is literally service design, which is why SDSI is your best Erasmus Mundus target.

Native French. This is worth more than it appears. Marketing is a language-heavy profession; in France, Belgium or Luxembourg you can work in the local language from day one, while in Ireland or the Netherlands you'd compete against native English speakers for English-language roles.

What's weak, stated plainly

- **No English test.** Fixable in weeks. It is currently your single binding constraint.
- **12–13/20 GPA.** Modest. It closes Germany, makes ULiège marginal, and probably rules out MAGMa. It does *not* close Austria, Poland, Italy or Ireland, because those select on subject tests and interviews rather than GPA ranking. Choose accordingly.
- **No European work experience.** The most important thing your master's can fix.
- **No music portfolio.** You are a self-taught hobbyist producer. Do not overstate this in applications — programmes that require a portfolio will see through it, and you don't need to compete on that ground.

The five things to do in the next 6–12 months

In order of return:

1. **Choose your programme partly on whether it includes a European internship or *alternance*.** This is worth more than everything else on this list combined. Graduating with a European internship on your CV is what converts a degree into a job offer, and a job offer into a visa.
2. **Publish the CRM project as a documented GitHub repository.** Screenshots, architecture notes, the problem it solved, the results. Right now it's a line on a transcript; it should be a link you can put in every application and every job interview.
3. **Learn SQL and Python,** plus GA4, one customer-data platform, and one BI tool (Power BI or Tableau). These are the specific skills that move you from "marketing graduate" to "marketing data analyst".
4. **Sit IELTS.**
5. **Start Spanish** — but only if you're targeting 2028.

The strategic point that matters most

Immigration systems across Europe have independently converged on the same rule: they keep the door open for technical roles and close it for non-technical junior white-collar ones. Look at the UK's own occupational medians against its £41,700 permit threshold:

Role	Median pay	Clears the bar?
Advertising/marketing associate	£33,400	No
Arts officer/producer	£38,100	No
Musician	£37,500	No
IT business analyst	£54,900	Yes
Programmer	£54,700	Yes

France draws the same line at 1.5x the minimum wage — about €33,600/year. A junior CRM or data role in Paris clears it. A junior label or promotions role does not. *(This threshold is from secondary sources — the official pages were unreachable — so confirm it before relying on the exact figure.)*

The practical consequence is almost absurdly specific: the job title on your contract decides whether you can stay.

"Marketing Executive" — loses. "Marketing Data Analyst" — wins. Same work. Same company. Different outcome.

So: **lean technical.** Choose programmes with a data component. Take the analytics electives. Build the GitHub portfolio. Your CRM project makes this a realistic repositioning rather than an aspirational one — you have already done the thing, you just need the credential and the vocabulary to match.

And treat music as a sector, not a job description. The sponsorable door into the music industry is a data or CRM requisition at Spotify, Deezer, Believe or Universal — not an artist-management role at a four-person label. Bologna's GIOCA is on your shortlist precisely because it lets you study the culture industry without giving up a management-track qualification.

What we couldn't finish

Five research streams were cut short when the session hit a hard capacity limit. In fairness to you, the gaps that could change your decisions:

- **Nobody swept Austria properly.** FH Kufstein — your top recommendation — was found incidentally by a researcher working on something else. There are likely other Austrian applied-sciences programmes just as good, and **this is the first gap worth closing.**
- **France's IAE network is under-sampled** — six of about thirty. France is your best-fit country.
- **Scholarships are now researched and verified.** Two findings belong here: **Austria, your top-ranked destination, has no national scholarship open to you** (Ernst Mach does not fund full FH degrees; Erhard Busek is suspended), so cost it as fully self-funded — survivable at €727/year, but do not budget on aid appearing. And **the Tunisian government grant we initially recommended is closed to you** — see deliverable 5.
- **Cost-of-living figures now exist** for French cities. Rennes is cheapest at €1,192/month, Paris dearest at €1,627 — a €4,800/year gap, more than a year's tuition. Montpellier has free public transport.
- **No cost-of-living figures anywhere.** Every researcher declined to estimate rather than publish unsourced numbers. You'll need these to budget, and they're easy to find yourself.
- **The Nordics were never swept** — though on cost they were unlikely to survive anyway.
- **Most 2027/28 deadlines are unpublished.** Dates here are largely the 2026/27 cycle, used as an indication. **Re-check every deadline before you rely on it.**
